

The
BARN YARD

POST & BEAM | GARAGES | PAVILIONS | SHEDS

Our Mission

IS TO BUILD QUALITY STRUCTURES WHILE
PROVIDING AN UNMATCHED CUSTOMER
EXPERIENCE AND PRESERVING THE VALUES
THAT FOUNDED THE BARN YARD IN 1984.

Family-Owned Since 1984
Chris Skinner & Everett Skinner IV P.E.

Stake your claim.

We believe that a quality building becomes so much more than just a building. It becomes a place where classic cars are collected, where the reliable tractor awaits the next snowfall, and where families gather to celebrate life's most joyous occasions. That's why our father, Everett Skinner III, and our grandfather Bill, started The Barn Yard in 1984. Fast forward to today and our dedication to quality has driven us to a full fleet of delivery trucks, multiple full-time build crews, and a state of the art timber frame facility. Because how we build it today makes all the difference tomorrow. We are excited to get started on your project.

THE SKINNERZ FAMILY

POST & BEAM BARN

COMPLETE BUILDS & TIMBER FRAME KITS

AUTHENTIC MORTISE & TENON JOINERY

All of our timber frames are cut on our state of the art CNC machines in our 38,000 sq. ft. facility which allows us to offer the most authentic, precise, and complex mortise & tenon joinery available today.

LARGER TIMBERS

We use larger 8x8 posts, 8x12 tie beams, 4x8 braces, and heavy timber rafters. Larger timbers connected with authentic mortise & tenon joinery create a stronger frame. We craft true post & beam barns, from the timber sill all the way up to the peak of the heavy timber roof rafters.

BUILDERS, DESIGNERS, ENGINEERS

Designers, multi-state licensed structural engineers, and expert timber framing crews take your project from the foundation to the finishing touches.

POST & BEAM 2-STORY BARN

The quintessential New England barn, built using authentic post & beam construction with the most precise mortise & tenon joinery available today. One step inside and you will be moved by the artistry and details. With arched braces and large timbers, the Carriage Barn is nostalgically beautiful, leaving a lasting impression.

Carriage Barn Overview

STANDARD FEATURES

- Stamped Engineered Plans for Barn & Foundation
- Authentic Mortise and Tenon Post & Beam Construction
- Eastern White Pine Timber Frame with Finished Planed Surface
- Traditional Wood Joinery with Hardwood Oak Pegs (no Visible Fasteners)
- 6x8 Timber Sills, 8x8 Posts, 8x12 Tie Beams, 4x8 Loft Joists, 8x10 Rafter Plates, 4x8 Arched Braces, 4x4 Siding Nailers
- 10' First Floor Ceiling Height (12'8" Eave Height)
- 1x10 Premium Kiln Dried Vertical Shiplap Pine Siding & Trim
- 10-12 Roof Pitch
- 4x10 Pine Rafters with Authentic Tongue & Fork Joinery
- 1x8 Premium Kiln Dried T&G Pine V-Groove Loft Flooring & Roof Decking
- Spacious Second Floor Loft Area with 3' Knee-wall & 8' Collar Tie Height
- Timber Stairway to Second Floor (3'-6" Wide)
- 4" Gable and 10" Eave Overhangs
- 30 Year Tamko Architectural Shingles Over Synthetic Underlayment
- Arch Top Gable Vents

POPULAR OPTIONS

- Frame Options: Hemlock, Douglas Fir, Oak
- Upgraded 2x8 Loft Flooring/Roof Decking
- 8' – 14' Lean-To (Enclosed or Open)
- Andersen 400 Series Windows
- Overhead Door with Pine Facing & Hinges/Handles
- Handmade Spanish Cedar Entry & Garage Doors
- Pine Sliding Barn Door with Horseshoe Track Hardware
- Gable/Shed/Transom Dormers
- Timber Workbench
- Exterior Timber Frame Accents
- Structural Insulated Panels (SIP)
- Cupola & Weathervane
- Electrical

Saratoga Barn Series

60' x 60' Preakness, Hudson Valley, NY

POST & BEAM 1½ STORY
CENTER AISLE BARN

Inspired by the traditional center aisle horse barn, our Saratoga Barn Series has an impressive timber frame design that lends itself to a wider footprint. Floor to ceiling posts, a stunning interior, and the option of either a center loft or gallery loft make this a great choice for modern entertainment spaces.

Gambrel Barn Series

54' x 48' Homestead

POST & BEAM 1½ STORY
GAMBREL-STYLE BARN

Inspired by barns of the Midwest, the Gambrel Barn Series symbolizes the practicality of the American barn and the ingenuity of early American pioneers. Creative in its gambrel design, maximizing upstairs space, and practical in its spacious first floor with single or double lean-tos, this barn has stood the test of time.

Monitor Barn Series

42' x 48' Pinedale, Sutton, NH

POST & BEAM 1½ STORY
MONITOR-STYLE BARN

The Monitor Barn Series, with its raised center section and double lean-tos, is as functional as it is photogenic. With a historic look, the Monitor Barn Series is right at home anywhere in the country, and brings with it the feeling of the Rocky Mountain west. This series has the style—and the space—for all your barn needs.

Quincy Car Barn

26' x 42' Quincy Car Barn

POST & BEAM SINGLE-STORY BARN

Designed with showcasing in mind, the Quincy Car Barn has three glass overhead doors leading into the single story barn. Marvel at the heavy timber king post style roof trusses inside, which command your attention and enhance the barn's interior. There's space for a workshop, as well. And, an open lean-to shelters the side entrance from the elements.

JOINERY

Joinery is the art of joining timbers with wood connections. The precise mortise & tenon joinery used in our post & beam buildings is the result of crafting every timber with our state of the art CNC machines.

WEDGED ANCHORBEAM TENON JOINERY

The wedged anchorbeam tenon is designed to resist the outward thrust cast on the principal posts and anchorbeam by the roof system. The anchorbeam is carved out to create a through tenon, which passes through a mortise and is tightly secured with two oak wedges.

TONGUE & FORK JOINERY

Our tongue & fork rafter peak connection is extremely precise and strong. In addition, we use 4x10 timber rafters for an extra-strong roof system.

KNEEBRACE JOINERY

Kneebrace joinery creates a triangle where the post meets the beam. This provides rigidity to the frame, and is one of the reasons why timber frames are so strong. We arch all of our kneebraces as part of our signature style.

DOVETAIL JOINERY

We dovetail the floor joists so they sit flush with the top of the beams. What this does, besides adding character, beauty, & strength, is allow for more upstairs headroom.

MORTISE & TENON JOINERY

Mortise & Tenon is the fundamental joint in all timber framing. Other joinery is generally a variation of the mortise & tenon. For added strength, we house all of our mortise & tenon joints so that the weight is not only bearing on the tenon, but on the post as well.

HALF LAPPED SCARF JOINERY

This joinery serves to join timbers together to create a longer beam. At The Barn Yard, we reinforce our half-lapped scarf joints with a concealed steel plate and steel pins. This makes the joint many times stronger than if it were a wood-only connection.

TIMBER SILL JOINERY

Even though we use a concrete frost wall foundation with footings well below the frost line, we still employ a heavy 6x8 timber sill under all our barns. This has the benefit of added strength and of course authenticity.

Timber Species

EASTERN WHITE PINE \$

Local species harvested in New England, clean white appearance, low checking, low shrinkage, good strength characteristics.

DOUGLAS FIR \$\$\$

Harvested in west coast US, reddish appearance, low checking, moderate shrinkage, superior strength characteristics, less knots.

HEMLOCK \$\$

Local species harvested in New England, moderate checking, moderate shrinkage, good strength characteristics, recommended for use in horse barns.

OAK \$\$\$\$

Local species harvested in New England, high checking, high shrinkage, superior strength characteristics.

Siding Options

Choosing the right siding for your barn, cabin, barn home, or custom garage is an important decision. We have a variety of options, including wood, barn board, and vinyl, with many colors to choose from. Contact a sales representative for more information.

Garaga Acadia Overhead Doors on 24' x 24' Newport Garage

Dormers & Lean-tos

Create more space in your barn or garage by adding dormers or lean-tos. An enclosed lean-to creates more space on your barn or garage's interior, while an open lean-to provides additional exterior space. A dormer can let more light into the second floor, while adding more vertical space.

DORMERS

Big Sky Timber Frame Eyebrow Roof and Timber Truss Accent with Show Rafter on 30' x 34' Plymouth Carriage Barn

Post & Beam Insulation Packages

For our post & beam barns, cabins, and barn homes, we offer specialized insulation packages. From the light insulation of ZIP R-Sheathing, to the code compliant insulation SIPs can provide, we have options for every purpose and climate. No matter which insulation package you choose, you won't sacrifice the depth of the timbers—our panels are installed on the exterior of the timber frame.

PRE-CUT SIP PANELS

Barn Package
Walls: 4.5" EPS
Roof: 4.5" EPS

Code Compliant Package
Walls: 4.5" EPS
Roof: 8.25" EPS

ZIP R-SHEATHING

Walls: 2.5" ZIP R-Sheathing
Roof: 2.5" ZIP R-Sheathing

SIP Wall Section

ZIP R-Sheathing Shown on Walls; 8.25" SIPs Shown on Roof

Service Cavity

To better prepare your building for electrical, plumbing, and other utilities, we are able to design your barn, cabin, or barn home with a service cavity detail. On the walls, a spacer is added between each post and the SIPs to accommodate electrical systems. On the second floor, I-joists are added above the timber frame floor system to create a cavity for plumbing and other utilities. By utilizing our service cavity detail, finish contractors will be able to install utilities the same as usual. The full depth of the timber frame structure remains exposed on the interior.

Spacers Create Room Between SIPs and Timbers for Utilities

Finished Service Cavity in Custom Timber Frame Barn

CUSTOM GARAGES

DETACHED MULTI-CAR GARAGES,
1-2+ STORY, BUILT ON SITE

CUSTOM BUILDERS

Custom designed, professionally engineered and built on site, we are real custom builders. We have all the experience & resources necessary to bring your custom project to life.

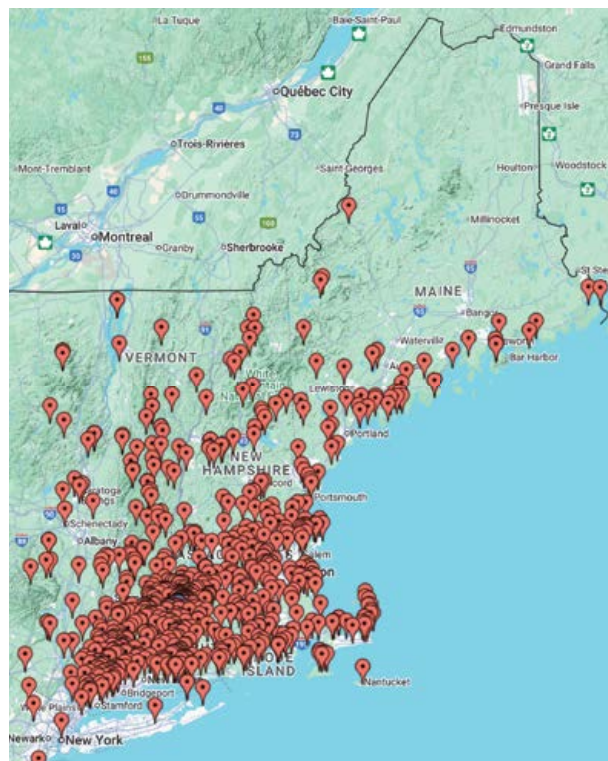

IN-HOUSE DESIGN & ENGINEERING

We have a full in-house design team and multi-state licensed structural engineers. This means our buildings are designed to meet even the most strict building codes.

PROFESSIONAL CRAFTSPEOPLE

Our crews are trained professionals, from building the wall panels in our manufacturing facility, to bringing them out to your site, craning up the walls & roof trusses, and completing the finishing touches on your finely crafted garage.

Foundation

CONCRETE FROST WALL

A concrete frost wall is the best foundation for any custom building. Prior to pouring the foundation, the site needs to be cleared and footing trenches are dug below grade in accordance to code. This type of foundation is built using a continuous footing that is set below frost level.

A continuous concrete wall is then built on top of the footing that will be exposed above finished ground level 12" for water protection. A finished concrete slab is then poured on a compacted gravel base for a smooth finish inside the garage. A concrete frost wall foundation is the best choice for challenging sites that may be far out of level.

The Barn Yard is pleased to offer you complete site work, excavation, and concrete foundation services. You can take confidence in the many satisfied customers who have utilized our services and let us handle the job from the initial excavation of the foundation to the finishing touches on your fine crafted building.

Ask About Our Foundation Service
Let our professional crew handle your site work and foundation. Contact us for details.

Our Process

Sales. You're the reason we do what we do. We're here to listen & help bring your dreams to life.

Design & Engineering. Inspired design & expert engineering licensed in any state you need.

Project Management. You'll have a dedicated project manager to guide you through each step of the process.

Wall Construction. We build the wall panels in a controlled environment to ensure the highest quality.

Build. The walls arrive onsite, the crane shows up, and before you know it, your building is standing.

Complete. It's time to enjoy your new building and show it to friends & family.

A CLASSIC IS ALWAYS IN STYLE

The Classic Series includes upgraded MiraTEC® Trim on the doors, corners, & fascia, and it is available in any of our paint colors. Classic buildings feature 6" overhangs. Enhance your Classic Series building by adding transom windows in the door.

Highly recommend The Barn Yard as the quality is top notch. They were communicative, on time (if not early), and made the process very easy & relaxing.

A TRADITION OF QUALITY AND VALUE

Our Traditional Series buildings are time-tested and proven. Constructed with top quality craftsmanship, our buildings are durable enough to accommodate all of your vehicles and lawn equipment — as well as withstand New England weather.

Great service from sales to installation.
Delivered on time as promised and even used their
amazing trailer to save a tree in my yard.
The shed is perfect in every way.

Timber Frame Shed Accents

Adding timber frame accents to the exterior of your shed enhances its appearance. Create visual interest in the gable ends with accent trusses or show rafters, or add an eyebrow roof over the entry and overhead doors for a stylish look. All accents are Eastern White Pine timbers pre-stained Espresso.

Frequently Asked Questions

READ MORE
ONLINE

Do I need a building permit?

The Barn Yard provides every customer with an engineered drawing of their building, our insurance information, our contractors license, and all other necessary paperwork to obtain a building permit. **It is the customer's responsibility to obtain a permit.**

What is your warranty?

We offer a 10 year warranty on every storage building. This covers all of the structural areas including the roof, floor, and walls.

How do I get ready for the delivery of my shed?

We make it easy. Ask about our stone pad service.

What are your payment terms and options?

Payment terms vary depending on your specific building, but typically a 1/3 deposit is required to order your building. We accept Cash, Check, Visa, Mastercard, AMEX, & Discover Card for your initial deposit, with the balance due upon delivery. Financing is also available.

WHAT ARE THE DIFFERENCES BETWEEN YOUR SERIES?

Size, height, roof pitch, and overhang style are key differences between our buildings, as illustrated in the diagram.

Site Preparation

The Barn Yard not only provides you with affordable, quality storage buildings, but we can also help you properly prepare your site. By utilizing The Barn Yard's Stone Pad service, you and your building will benefit in many ways, including maximizing the appearance and durability of the building as well as extending the lifespan of your building.

Remember, installing a stone pad does not mean placing the storage building onto blocks, or a simple layer of stone. To create a sufficient stone pad, we recommend that you designate a level area for your building and we'll prepare the stone pad with 3/4" crushed stone, 4-6 inches deep, 1' larger than the footprint on each side of the building to obtain ultimate benefits (e.g., 10' x 16' building = 12' x 18' stone pad).

WHY IS A STONE PAD IMPORTANT?

- 100% Floor Support
- Drainage
- Appearance
- Lifespan

ASK ABOUT OUR STONE PAD SERVICE

Our professional crew takes care of the stone pad for you. It's well worth it to have our crew do the work.

- Laser-Levelled Stone Pad
- Work Completed to Our High Standards
- Extremely Convenient

A quality building deserves an equally quality stone pad.

Standard Truck & Trailer Delivery

Delivery

DELIVERING MORE THAN WHAT'S EXPECTED

No site is too difficult for The Barn Yard. Before you rule out the delivery of a fully assembled shed, send us pictures of your site. More often than not, our professional drivers can maneuver your shed carefully around obstacles and set it perfectly in place.

DELIVERY OPTIONS Truck & Trailer, Mule,* Crane*
*Additional charge. Ask for details.

★★★★★

The delivery driver was truly awesome. Around trees, 200 feet off the driveway, and not happy until it was placed exactly on my marks. Thanks to all!

PETER, BETHLEHEM, CT

SHED DELIVERY VIDEO

Premier Delivery Service

Premier Delivery

ONLY THE BEST

By using the Mule instead of a typical shed delivery with truck and trailer, almost 20,000 pounds are removed from your yard. Tight spaces and challenging sites that may have been an issue before with traditional truck & trailer shed delivery are now no problem for the Mule.
